Environmental Policy of DONATH GmbH & Co. KG

We consider environmental aspects when planning and delivering our services. This Environmental Policy describes our operational measures and internal principles.

Transport and Virtual Pre-Move Surveys

- We also use electric and hybrid vehicles for business journeys.
- We consider distances and vehicle capacity utilization when planning routes and work with partners to coordinate transport operations.
- We offer virtual pre-move surveys. A fully virtual survey eliminates the need for our staff to travel to the customer's premises.

Packaging and Materials Handling

- We consider recyclability when selecting packing materials.
- We implement measures to reduce single-use materials.
- We pay attention to recycling and the responsible handling of materials.

Building Systems and Digital Processes

- Photovoltaic systems, heat pumps and LED lighting are used at our Steinbach premises.
- Charging stations are available for our company's electric vehicles.
- We use digital documentation and processing workflows.

Internal Organization

- We are committed to complying with the environmental regulations applicable to our activities.
- We regularly review and revise our operational environmental measures.
- We raise our customers' awareness of environmental aspects related to our services.

Michael Donath
Managing Director
